Puly caff instructions

Home / Barista / Cleaning products / Puly Caff Cleaning Powder 900g Home / Barista / Cleaning products / Puly Caff Plus Soak kit DetailsReviews Specifications These 2.5g tablets are the same as the Puly Caff powder but in tablet form. They are intended for use with beans-to-cup machines or for those that prefer a more convenient measured dose. Either put one into your beans-to-cup machine as per the manufacturer's instructions and run the pre-programmed cleaning cycle, or simply place a tablet in the blind filter when backflushing an espresso machine that has a commercial-type group head (one with a pressure release mechanism). If your machine is not suitable for backflushing then these tablets can be dissolved in warm water and the resulting solution used to clean the group head, filter holder and filter baskets. We recommend you wear gloves for this. Puly Milk Cleaner - PU000870 Puly Caff Powder - PU000851 Write a review and let shoppers know what you think of this product. Puly Caff Trade deal. Puly Caff removes all the gunk and tannin that espresso drinks leave behind. Bang in the internals of the coffee machine. Buy the Puly caff trade deal. Be surprised how dirty the inside of the coffee machine was. Looking at the colour of the foam that comes out. Do not use an espresso machine without it. Use in conjunction with a group head cleaning brush. To back flush also purchase a Puly Blindy Basket. Use Puly Caff trade to soak your filter holder handles and coffee baskets overnight. Rinse them out with water afterwards for a good as new look. Read the Happy Donkey guide to back Flushing on the coffee blog Clean and win. Puly Caff Powder Back flush with Puly Caff powder has three wins: Better tasting espresso from Happy Donkey coffee beans. Better Aroma. Cleaner tannin free pipes. Consequently better heat transfer. Resulting with a better Crema layer ! Simply the best. As simple as it sounds. back flushing might be a confusing topic for coffee makers. What qualifies as a clean machine and what doesn't? How often should we be cleaning espresso machines? What about keeping milk jugs and thermometers clean? And, can you clean without the use of the powder? Let's dive in! A clean machine sparkles inside and out. It needs to run clear water when back flushed. Further more detailed information read the backflush espresso machine how to. Baristas must clean espresso machines every day. Coffee accessories can be soaked in hot water. Mixed with dissolved Puly Caff powder. Machines can be cleaned with water alone first thing every day. This works well. If the water from the flush is clear then it is usually clean. However it will not stay that way for long without using Puly. Which coffee machines? Designed to use with Coffee machine three way solenoids. Almost all commercial machines use a 3 way group solenoid. Domestic machines Gaggia Classic and Rancilio Silvia also have three way solenoids. All the standard makes about use Puly like La Spaziale, Iberital, Expobar, Astoria, Costa and so on. For a bean to cup machine use Puly Milk. Clean machines are happy machines ! Remember no matter how much is purchased at a time. The carriage fee is the same. For best value consider buying two of these and receive one box full. Display some on a shelf in view of the public. Show them the coffee machine is well cared for and maintained. All with the best coffee cleaning products money can buy. Non hazardous and environmentally friendly. Use Puly Caff trade as part of the companies best practice policy. "We back flush both machines , soak our portafilters over night every night. Clean the filter baskets with it. At the end of every busy session we dissolve some in hot water and wipe the machines and surfaces down with it. I don't know what we would do without puly caff trade" Eileen P. Manager from The Hotel on the Bridge. orders over £50 ex VAT 18,496 reviews We're here to help: 01698 842528 FEATURES: Puly Caff BREW TABS was specifically designed in our Special Applications Research Centre, to daily service the brewing unit (filter, portafilter basket) and the washout valve of espresso coffee machines and American coffee machines, and at the same time in just one function the carafe, thermos or servers. Deodorizes and cleans all the parts that get in contact with coffee, tea or coloured infusion by destroying completely any organic residue, without increasing the extraction of toxic metals from common materials of fabrication in espresso machines when used and rinsed according to the manufacturer's instructions. It is unique for rinsing cups, tea pots, glasses or servers valves, etc., it cleans and eliminates all traces of coffee from crockery without affecting decorations in any way. The formulation is registered, tested and certified by NSF International protocol P152. DIRECTIONS FOR USE: a) insert in the filter basket one tab every 2 lts. of capacity of the container without using paper filter; b) turn on the cycle and let run water thoroughly into the carafe and let it work; c) discard the solution and remove any residue; d) rinse the filter basket and the container with running water. FREQUENCY OF USE: PULY CAFF BREW TABS is generally used every day as far as unit maintenance is concerned to keep the crockery clean and bright. We advise preventive measures to protect the equipment from irreversible damage and to get the best extraction of your blend of coffee, tea or infuse. Remember that a dirty brewing unit does not get the complete extraction of the blend of your coffee, tea or infuse. SELF CHECK: Inspect the result. Check that it smells right. If necessary, repeat the washing operation. CRITICAL POINTS: Check that the filter and filter basket are upright, and if necessary replace with new spare parts. Check that the dump is not clogged so that the PULY CAFF BREW TABS reaction can flow out freely. DATA AND SAFETY: See the SAFETY SHEET. During washing, be careful of splashes of boiling water; use protective garments (gloves etc.). Puly Caff Tablets, otherwise known as Puly Tabs are compressed pill like tablet detergent cleaners used for the cleaning cycles on bean to cup espresso coffee machines, sometimes referred to as super-auto or automatic cappuccino makers. They are Biodegradable in accordance with the laws in force and have been tested and consequently certified by the NSF. These Puly Tabs come in 100 x 1g, and are suited for small domestic and medium size commercial bean to cup machines or automatic cappuccino coffee makers and models such as: Koro, Jura Impressa and Jura X9,X7, XF50, X, Z, XS series, Lavazza Modo, Korinto, Kolbado, Cino, DeLonghi, Nuovo Simonelli Microbar, siemens, Solis, Franke Evolution + Flair, Z5A, Swiss Egro, Stafco Neva, Saeco, Gaggia, WMF Gastro, Presto , N and W, Prestolio, Saphira, Macco Sirio, Santos Cappu, Melitta, Horeca, Necta, Schaerer Siena Tasman, Real Bean and Azkoyen, information relating to sizing can be seen below in order to establish which item suits your requirements. For use just pop a tablet into your beans-to-cup machine as per the manufacturer's instructions and run the pre-programmed cleaning cycle, or simply place a tablet in the blind filter when back flushing an espresso machine that has a commercial-type group head (one with a pressure release mechanism). If your machine isn't suitable for backflushing, then these tablets can be dissolved in warm water and the resulting solution can be used to clean the group head, filter holder and filter baskets. We recommend wearing gloves for this. Each handy sized container of tablets is security sealed at the factory keeping them fresh and clean, ready for you to use on your machines next cleaning cycle. Puly Caff Group Head Cleaner and Puly Milk Frother Cleaner also available! Size: 100 x 1g tablets Key Features: Suited to most commercial automatic coffee machines Biodegradable 100 x 1g tablets Here at The Coffee People, we love to give a helping hand to coffee drinkers and machine users. This guide is to give both our customers and non customers alike, simple and easy instructions on how to use Puly Caff Powder (or whatever your preferred cleaning powder is) for coffee machine and equipment cleaning. There are usage instructions for both home and commercial users so be sure to read the one that is relevant to you.For those of you who are new to coffee machine cleaning - Puly are the world leading brand for Coffee Machine cleaning and their Caff Powder is specifically designed to clean the brewing unit and valve of your machine (either through backflush or water tank). The powder washes away the deposits and stains that have gathered in your machine over the weeks and is also perfect for soak-cleaning your equipment (cups, teapots, filters, group heads etc). Using it keeps your coffee tasting its best consistently and we can't stress enough how important it is to use. Puly Caff Powder fully complies with all food safety regulations and leaves no traces or odour in your machine - rather it helps bring out the true taste of your coffee through cleaning. How often you need to use it depends on how often you use your machine - below is for the average usage.Instructions for Commercial Machine Cleaning (through backflush): 1. Insert your blanking disc (or blind filter) into the Group Handle (Portafilter).2. Add one teaspoon (3-5g) of Puly Caff Powder into the Group Handle and place into machine as if making coffee.3. Start the brew cycle and wait for 30 seconds.4. Start the rinsing process - Do the above WITHOUT the powder twice to rinse.Your machine is now ready to use!Instructions for Domestic Machine Cleaning (through water tank):1. Dilute either: (Once a month) One whole sachet (or 20g out of tub) into about 1 litre of luke-warm water and add to your machines water tank OR(Once a week) One teaspoon (3-5g) of sachet or tub into half a litre of luke-warm water and add to water tank.2. Next, using your coffee making function, pump the solution through your machine until the water tank is empty. 3. Rinse your tank and fill it with clear cold water. 4. Pump the water through your machine until the tank is empty to clear away any remaining destainer inside. Your machine is now ready to use!Instructions for Soak Cleaning Equipment:1. Use a suitable tub and add Group Handles, Baskets, Tampers, Scoops etc.2. Add 3 teaspoons (10g) of Puly Caff Powder per Litre of hot water needed for equipment and leave for 15 minutes.3. Use a Group Head Brush to take off any remaining deposit from the equipment.4. Empty tub and rinse parts off with cold water.Your equipment is now clean!Please note that Puly Caff Powder powder only DESTAINS your machine. There is also a need to DESCALC machines using Puly Descaler Baby, which removes limescale and dirt from your machine - something that destainer does not do. Do both to keep your coffee perfect, as one powder can't do both jobs! You can buy the caff powder in many forms - we sell both the Sachets and the 900g tub. Please note that we have no ties or affiliation to any of the products promoted in this guide, we just love our coffee and believe that these are the best tools for the job!Domestic Users may also choose to insert a water filter/softener into the water tank to help remove any chemicals from the water that can inflict on the machine and also the taste of the coffee. If you are interested in seeing the items we sell then get in touch. If what you want isn't listed then we probably still have access to it for you, so get in touch!We hope you have found this guide helpful. Feel free to ask about our machines, service/repair offers and so on. Have a look around the site www.thecoffeepeople.org. puly caff tablets instructions
